

Thursday 10/29/2015

We met with Carrie Aigner and showed her our first working iteration of the Android app. She was very pleased with the functionality of the app, but wanted to make sure that there will be notifications for the random and end of day assessments. We assured her how that is our plan and we hope to implement the working notifications in our 2nd iteration. We ended the meeting by letting her know we will be sending her a plan for iteration-2 sometime the following week.

Team members present:

Taylor Van Cleave, Carruth Topham, Mike Huesing
